

[Windows Phone 7](#)'s [Zune](#) is a pretty good option for listening to music on [Microsoft](#)'s mobile platform. Specially with

[Mango](#)

, the music player has attained a certain sense of completeness. Now, most of the third-party apps related to music and songs can access the player too, allowing users to control whatever music they are playing through the stock player's interface. A lot of apps are making good use of this integration.

Lyrics Show

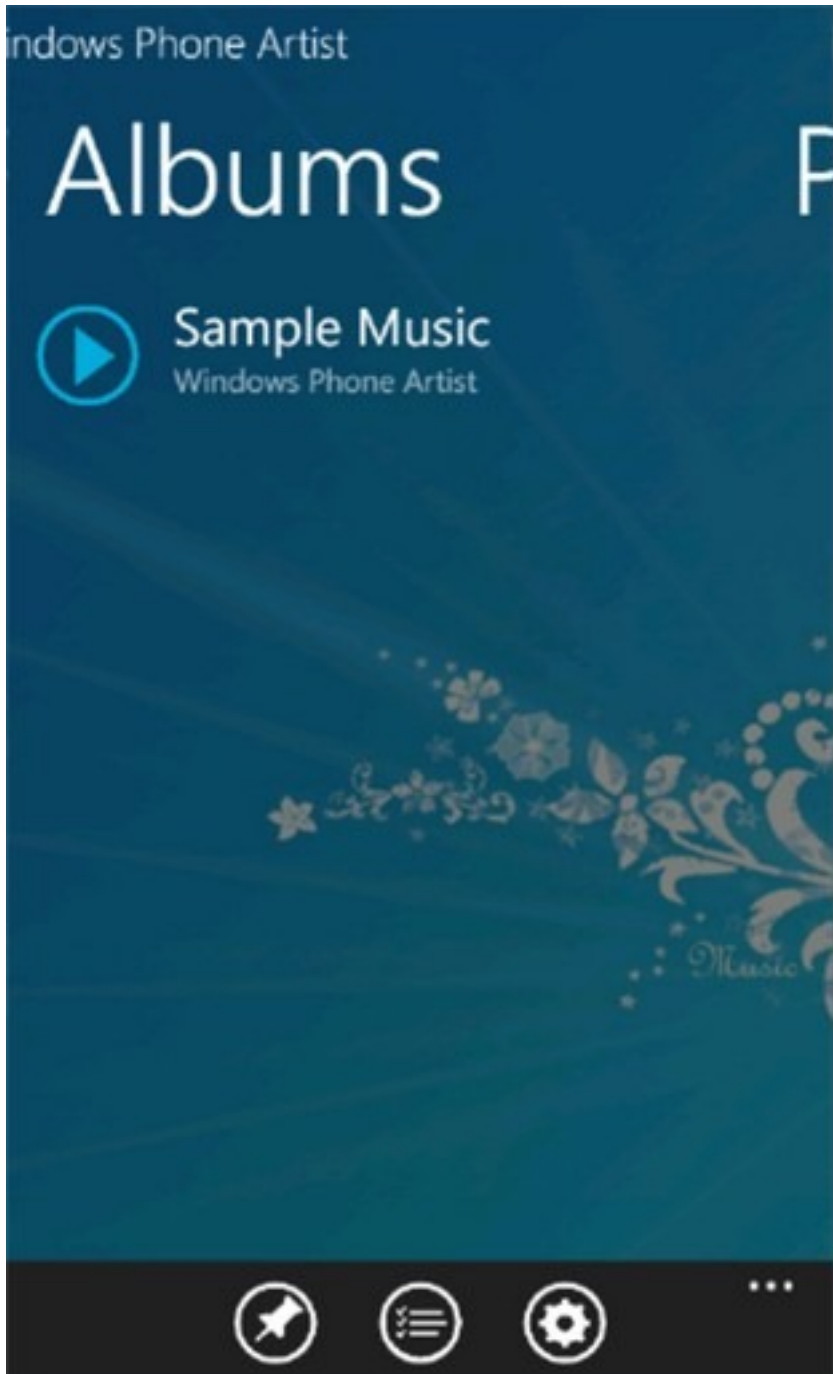

is one such app. It allows WP7 users to listen to the songs in their library while it displays the lyrics of the currently playing song, highlighting each verse in sync with the vocals.

Windows Phone Artist

Melody Song A

You know I'm telling, I'm telling you
No matter lightning or thunder,
Buckets of rainwater
You can't flood this town
In a world unknown
You've gotta hold your own
And you can't stop me
You're never ever ever gonna stop me now
Go ahead and don't believe
'Cause everyone needs a way to breath
And love and dream
And you can't stop me
Can't stop me
No matter lightning or thunder,
Buckets of rainwater
You can't flood this town
In a world unknown
You've gotta hold your own
And you can't stop me
You're never ever ever gonna stop
