

Often, we want to quickly go through sub headings of lengthy articles or [websites](#) , but tend to get caught up in the details.

### **Scrollbar Of Contents**

is a

[Google](#)  
[Chrome](#)  
[extension](#)

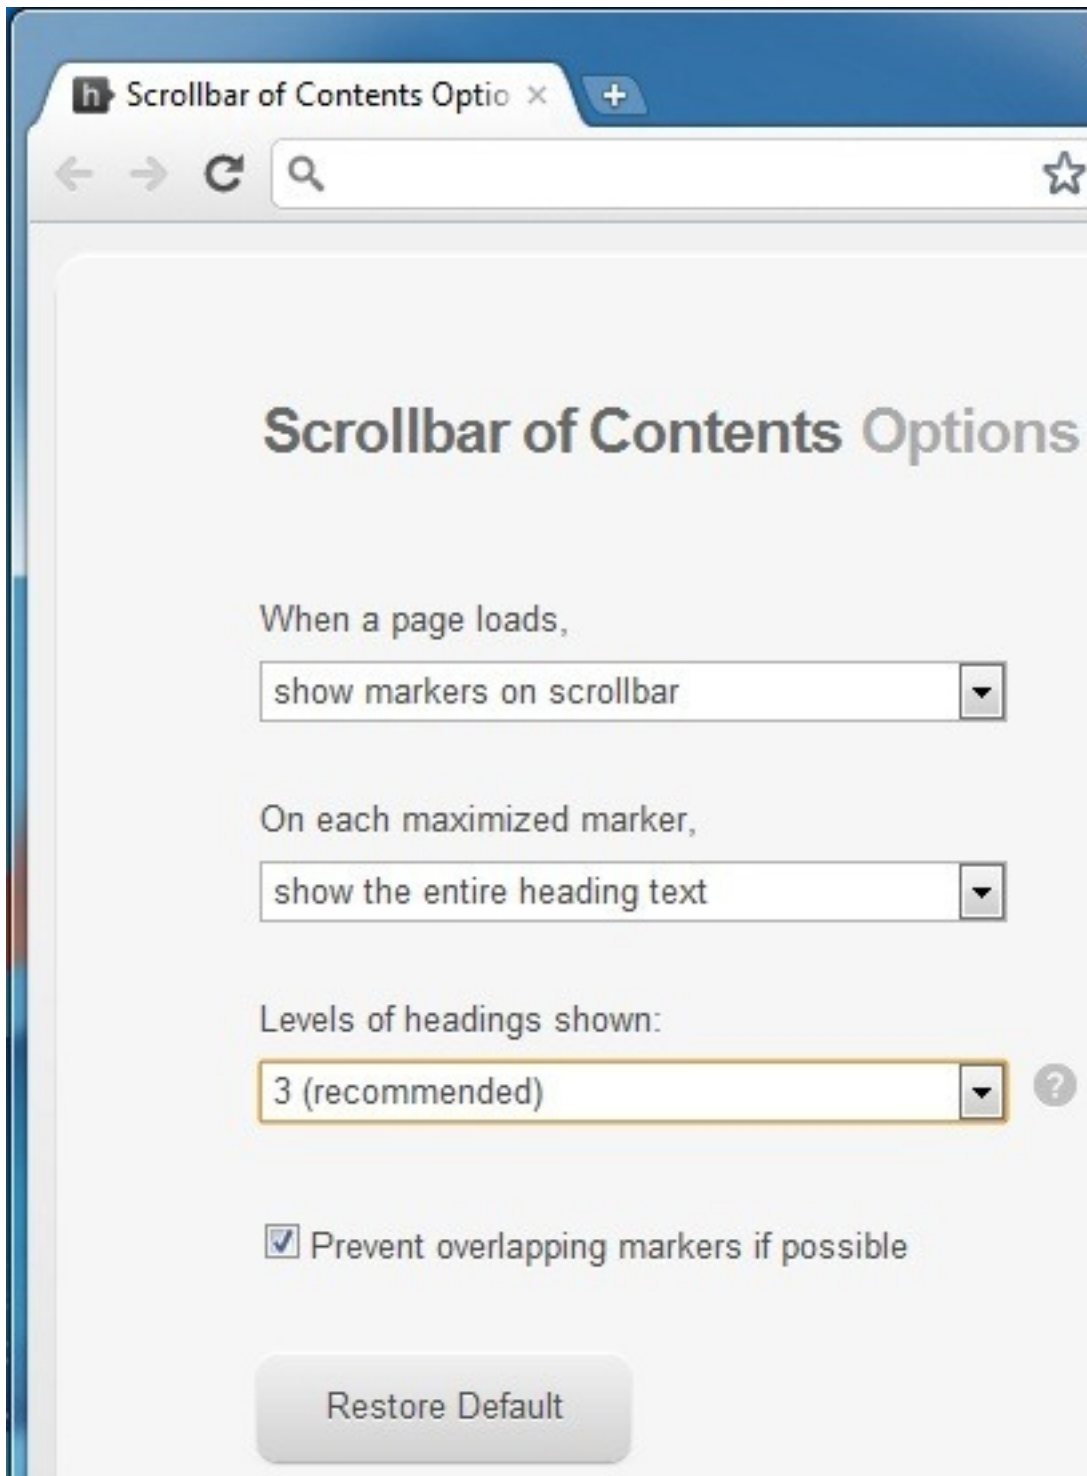

that can help you out. It works by generating clickable markers for all the headings on a website, and places them proportionately on the

[scroll](#)

bar. It especially comes in handy when navigating through long articles, or when you can not find a specific heading at first glance. Furthermore, you can minimize, hide, or show the markers using keyboard shortcuts, such as minimize/maximize (Shift-Alt-M) and show/hide (Shift-Alt-N).

Once you've installed the extensions, a button will be added right next to the URL bar. After a page is loaded, click the button to hide or display the heading markers. Click the markers to scroll to the corresponding section. Furthermore, you can customize how this extension works by accessing its options.

Both the scrollbar and the content are visible in the Chrome browser by adding the indicator
