

Desktop apps that let you view feeds from different social media accounts aren't rare but if you want something that can run in your browser, **Feedient** might be the answer. It's a web app that connects with your Twitter, Facebook, and Instagram accounts (YouTube coming soon) and lets you view feeds from all of them. Apart from Instagram, you can also post to your account and interact with the content e.g. reply to a comment or tweet. The app gives you a nice column view for each account and the columns can be moved around to suit your preference. The interface is nice and clean and seemingly free of bugs. Feedient is currently in closed beta but you can sign up for the service and a code should be in your inbox in a week or so.

The first order of business is to add your accounts. Go to settings and click Add account. You will have to authorize Feedient to connect with whichever social media account you are adding. Once you're done, click 'Feeds' to view your feeds.

The screenshot displays the Feedient application interface, divided into two main sections: 'Accounts' and 'Feedient account' settings.

Accounts Section:

- Header:** 'Accounts' with a group of people icon.
- Account List:**
 - Twitter: FatiWahab (with a close icon 'x')
 - Facebook: Fatima Wahab (with a close icon 'x')
 - Instagram: fatiwahab (with a close icon 'x')
- Action:** A large green button labeled '+ Add account'.

Feedient account Section:

- Header:** 'Feedient account' with a gear icon.
- LANGUAGE:** A dropdown menu showing 'English (UK)' with a flag icon.
- EMAIL ADDRESS:** A text input field containing 'fatima@addictivetips.com'.
- CURRENT PASSWORD:** An empty text input field.
- NEW PASSWORD:** An empty text input field.
- REPEAT NEW PASSWORD:** An empty text input field.
- Action:** A large green button labeled 'Save settings'.

Left Sidebar (Navigation):

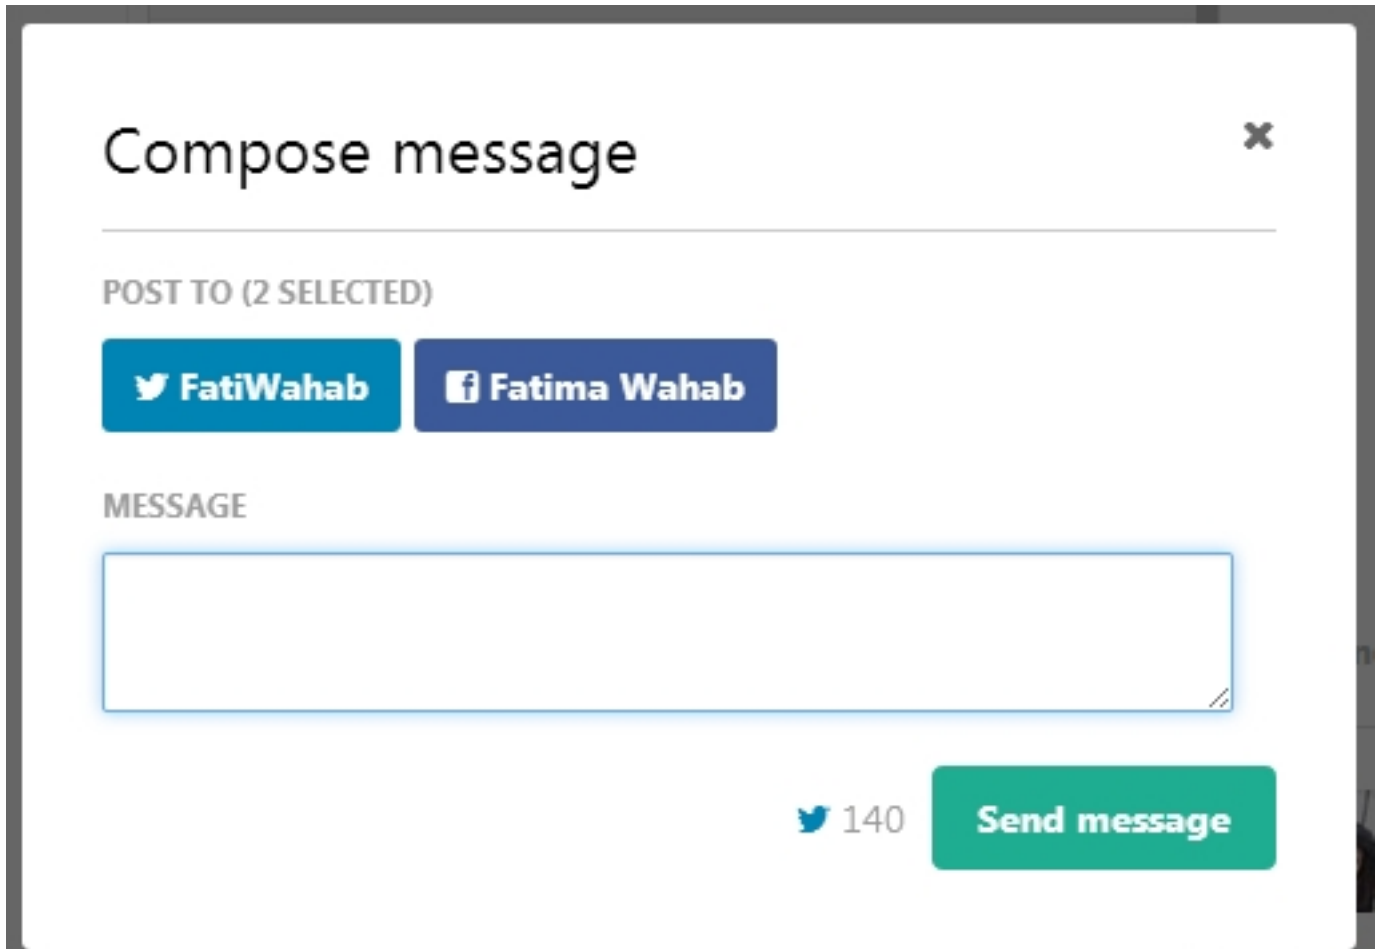

- Home icon (pencil in a square)
- Feeds icon (three horizontal lines)
- Settings icon (gear)
- Feedback icon (megaphone)
- Log Out icon (arrow pointing right)

Facebook, and again, we can't find the link for the Instagram feed, but we can find the link for the Twitter feed.

The screenshot displays the Feedient application interface, which is designed to aggregate social media feeds from multiple platforms. On the left, a dark sidebar contains navigation icons for 'Feeds', 'Settings', 'Feedback', and 'Log Out'. The main content area is divided into three vertical panels:

- Instagram Panel:** Shows a post from 'Cats of Instagram' (@cats_of_instagram) featuring a photo of a ginger cat. The text of the post reads: "From @what_in: 'This is Sebastian Simba, he is very playful and likes to cuddle! He purrs extremely loud and He loves to eat and nothing will stop him from getting to your food!' #catsofinstagram [catsofinstagram.com]".
- Twitter Panel:** Displays a tweet from 'Forbes Tech News' (@ForbesTech) with the text: "Can utilities adapt to emerging innovations that allow customers to 'bypass' their services? onforbes.es/1mmYPri". Below it, a tweet from 'samia ch' (@SMBuSHy_Wal) is visible, mentioning a wedding: "Shaadi Py : Yeh Khana Kab Khulna hy :D #GhareebonWaiBaten".
- Facebook Panel:** Shows a post from 'Ria Raja' about pizza: "Pizza...always comes in a sq open it ... it's n start eating it Life & People Look different ... Behave absob Fact of life: 5 Apple : Rs. 6 Apple 5 : Rs. 6".

and posted by Facebook on the left, on Twitter on the right, and by Facebook on the right. The interface is designed to be interactive, allowing users to expand, like, and comment on posts.
