

Social Lite is an application which makes it possible to manage [Facebook](#) , [Twitter](#) and [Gmail](#) accounts within a compact, [iOS](#)-style interface. This way, one can avoid using the browser for managing social media and Gmail accounts, and also receive system tray notifications for new updates. Furthermore, Social Lite is a [cross-platform](#) application with versions for Windows and Mac OS X. Details, screenshots, and download link after the break.

To get started, simply login to your Facebook, Twitter and Gmail accounts. Once logged in, you will be provided with an iOS style interface from where you can manage your respective accounts. There is a menu button located for each account (except Twitter), which bring up the numerous social media /Gmail options.

And you get updates about the your interface and also receive system notifications, its some messages

Screen 1 shows the home screen with only exceptions as the Facebook app, as far as separate log is played by clicking via
