

Netflix has more content than immediately meets the eye. If you open the 'Browse' drop-down you see a rather limited choice and some truly odd genres listed under it. For anyone new to Netflix, and given its recent expansion there's probably a lot of us, Netflix has what are called 'hidden categories'. These categories aren't directly accessible from the 'Browse' drop-down but they offer a genre classified look at Netflix's lineup. **Netflix Super Browse** is a Chrome extension that lets you access the hidden categories as easily as you can the default ones.

Install Netflix Super Browse and refresh Netflix. Next to the 'Browse' drop-down you will see a new Super Browse drop-down. If you don't see it right away, refresh the page a few more times (the extension is still in Beta). The drop-down reveals an alphabetical list of all the genres Netflix has shows and movies for.

Every page on the site has a search bar in the top right corner. You can also use the search bar to find specific titles or genres.
