

There are multiple CSS code generators that allow you to add effects either to images, text or elements. These code generators are what they are and give you the CSS code only. Few of them allow you to chose how you would like to load the CSS in your HTML file. What they leave up to you is creating the HTML file and defining classes in it manually. **XEO CSS** is a [CSS](#) code generator and an

[HTML editor](#)

. It creates an HTML file and gives the option to either load classes from HTML, IDs from HTML to elment names from it. Changes to CSS are made via a visual editor and there is little or no coding involved. You can save multiple files by signing up to the service and resume editing them anytime.

You don't necessarily have to sign up for an account, you will be able to use all features of the app without signing up but you will not be able to save files. When you first use the [application](#) , it shows you a mockup HTML page preview. Everything from the font, background color to the drop shadow can be edited.

How To Sync Or Transfer Data From One Android Device To Another

Most Android users are apt at backing up their precious data to a computer, but what if you are on the go? Well that's easy as well, but a better question is, how would you keep the two devices sync up? Well, the answer is to keep the same data across both? One answer is to back up your data to a computer on a daily basis and sync it up to the cloud. However, this method will consume a lot of time and you are bound to mess up. We've found some better solutions out there. Unfortunately, it's not a matter of using one app or a desktop app. This guide will attempt to bring forth some tricks and tips using multiple apps so that you can not only sync up your music, pictures, apps, notes etc. with your second Android device without having to use your computer.

at the end of the page, there is a small section for the page number, which is 2 / 4.

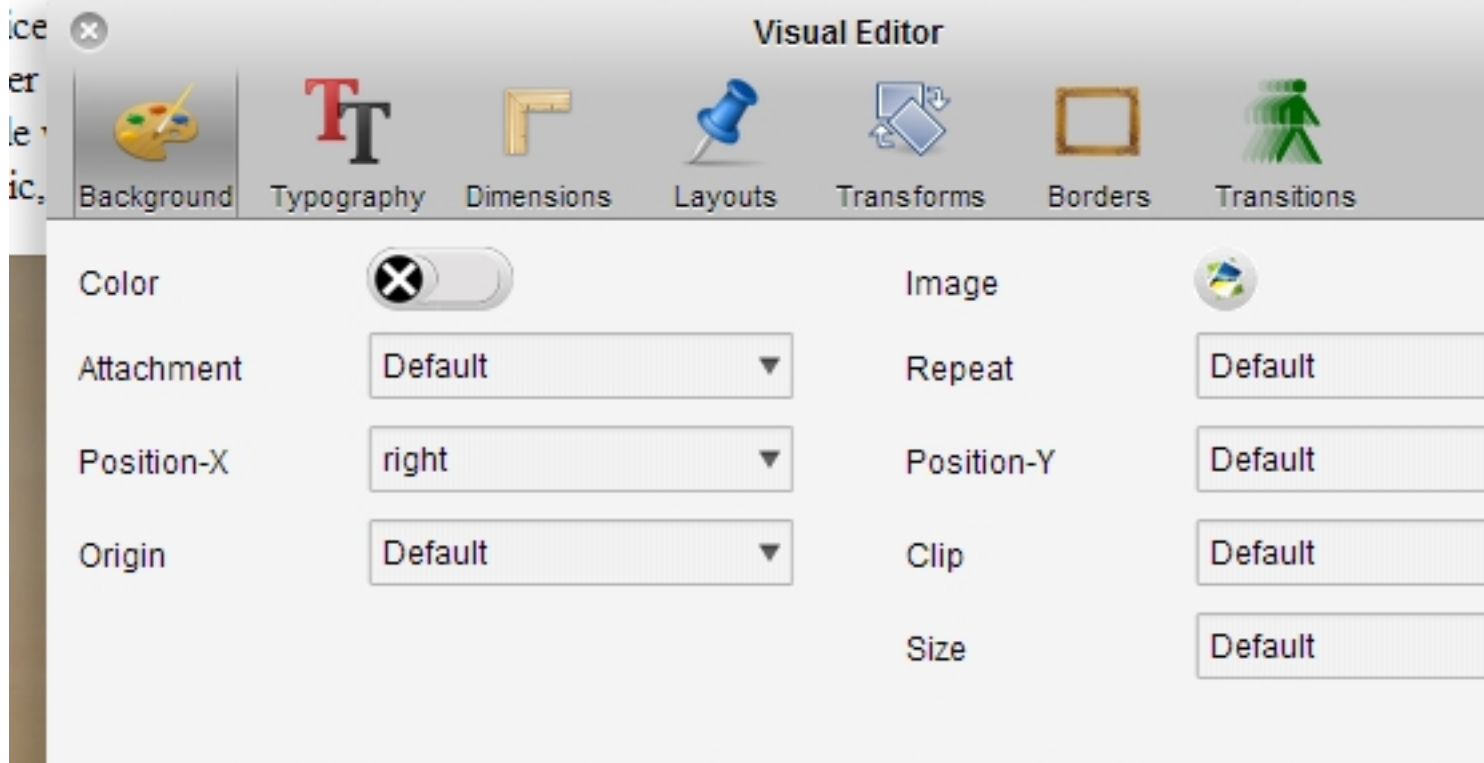

And the application also allows you to switch between the HTML editor, CSS Code, CSS Editor
