

I have a very bad habit of forgetting important events and tasks. For this very reason, I keep a tab on my daily agenda using task managers and to-do list apps. I have used various web, desktop and smartphone apps, all of which have always come in handy to manage my tasks. If you're in the hunt of finding an elegant yet easy to use task manager utility for Windows, take **Rainlendar**

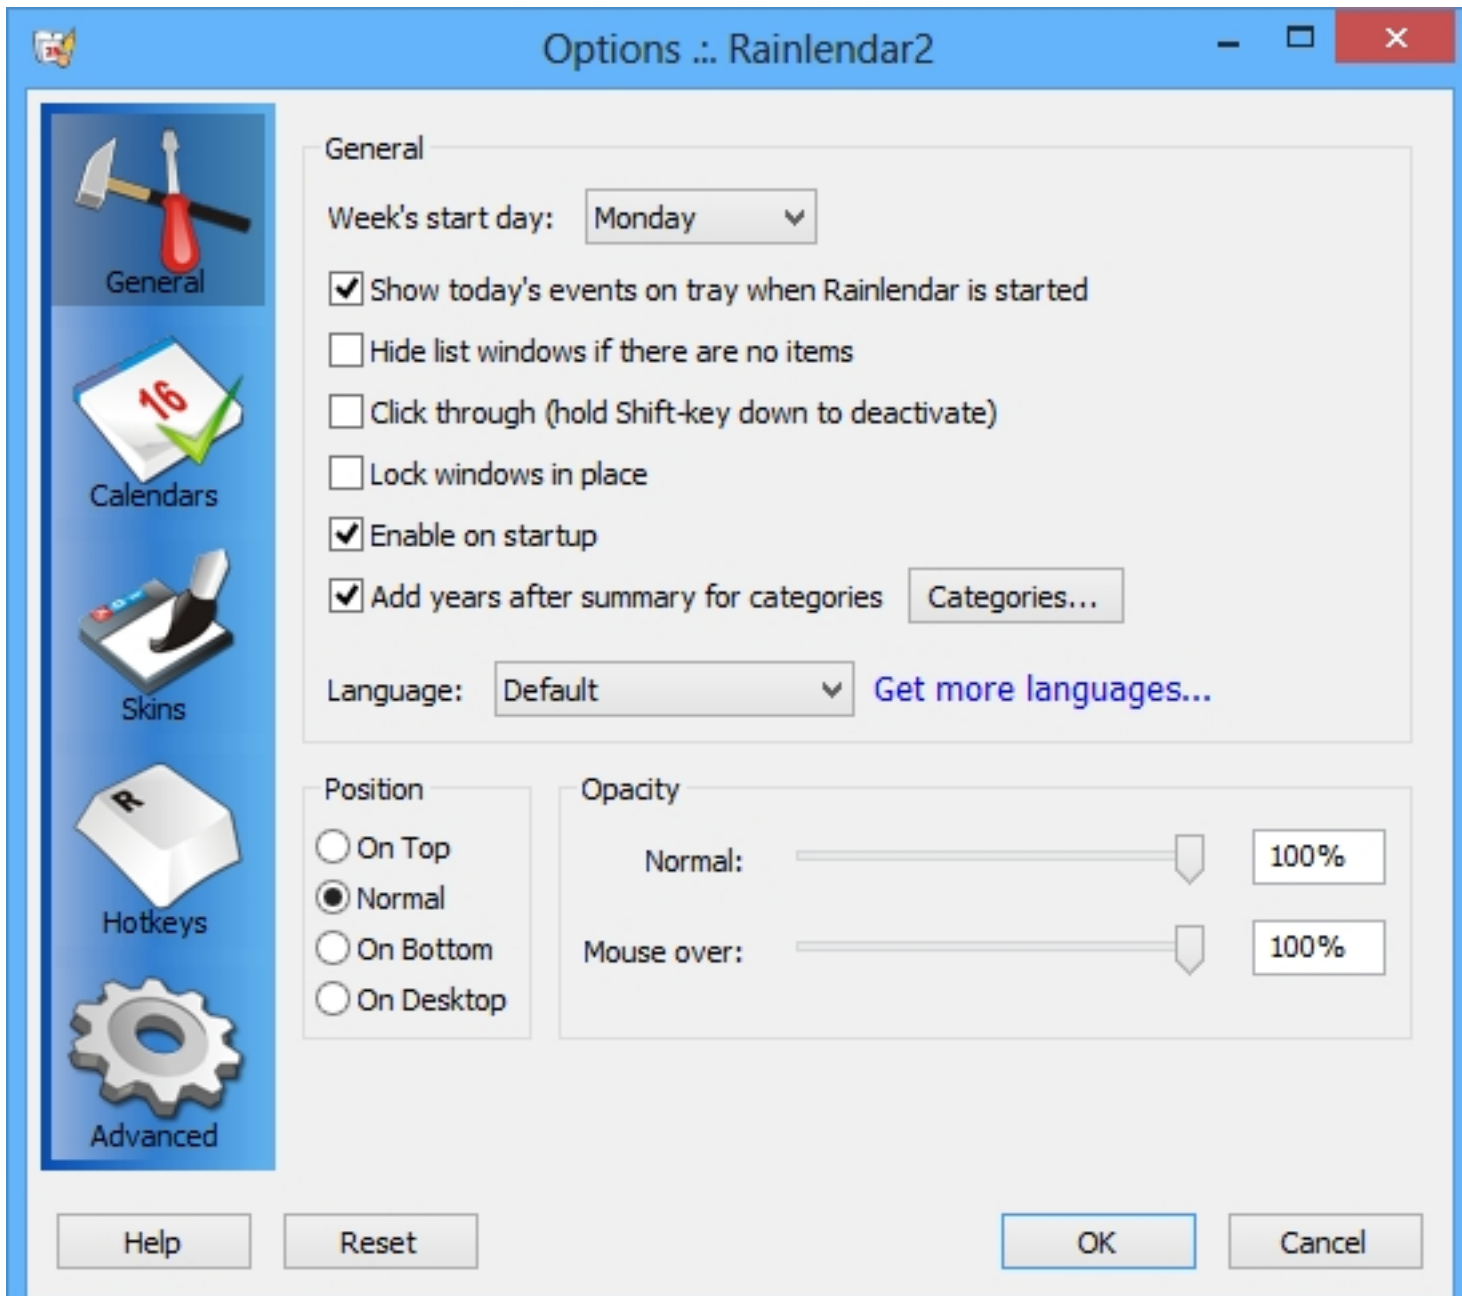

for a spin. It's a calendar and tasks based utility that sits right on your desktop. This fully customizable calendar allows you to add widgets with changeable skins, mark events, create tasks, and get notified instantly whenever an event is near or a task is due. Since it can be started during system startup, you can take a peek at your schedule the moment you logon to Windows.

I love easy to use apps that boost productivity. Thankfully, Rainlendar is no exception. Upon launch, it displays three widgets on the desktop i.e. Calendar, Event List and Todo List. The Calendar highlights the dates of added events and tasks. You may place the widgets anywhere on the screen. Event list displays the upcoming events, such as a friend's birthday, wedding or anniversary. Likewise, Todo list can be used to jot down various tasks you want to accomplish.

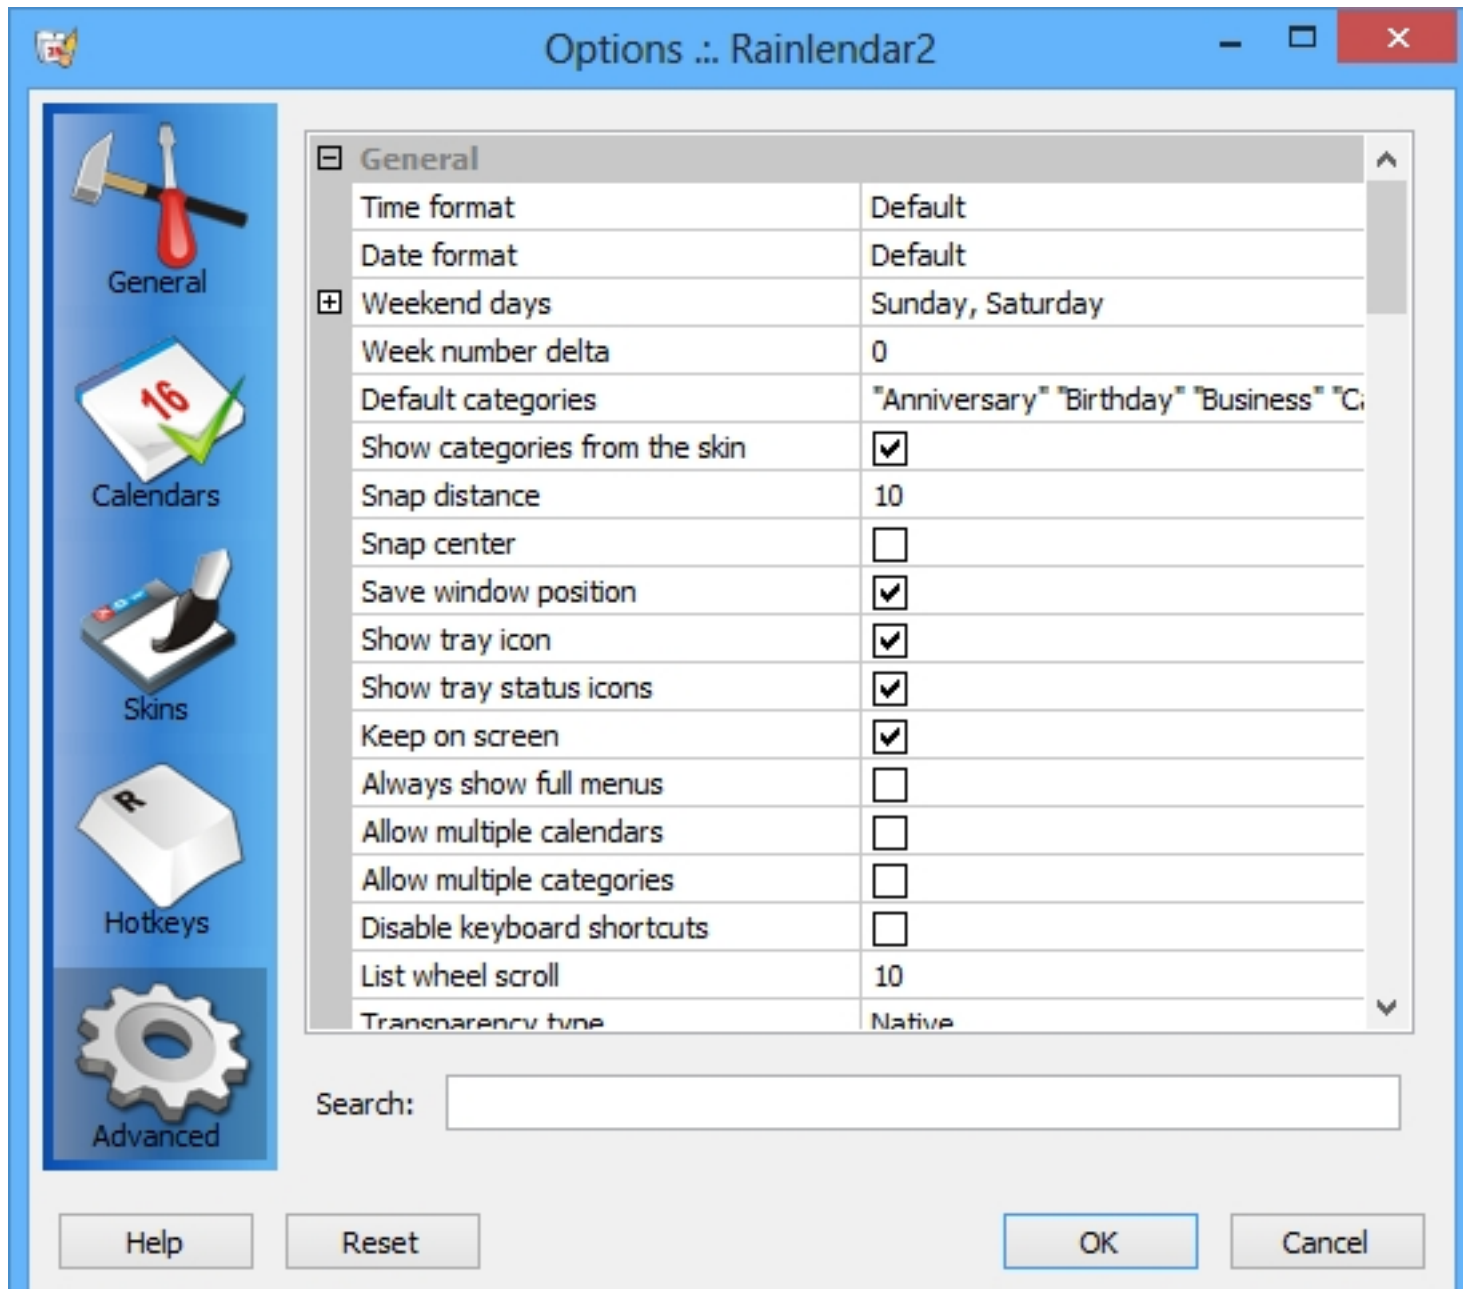

While Options is being selected, the application displays a list of settings, including the following: Calendar, Client, Hotkeys

With the help of Rainlendar2, you can create a beautiful and personalized desktop calendar and to-do list manager. It is a free and open-source software that can be used on Windows, Linux, and Mac OS. Rainlendar2 is a powerful tool that can help you manage your time and tasks more effectively. It is a great choice for anyone who wants to keep their desktop organized and clutter-free. Rainlendar2 is a free and open-source software that can be used on Windows, Linux, and Mac OS.
