

One click root for the Google Nexus 4 is now available! Earlier we brought to you an extensive guide on [rooting and installing ClockworkMod recovery on the Nexus 4](#) , and it was no walk in the park, to be honest. However, thanks to the hard work and efforts of XDA-Developers forum member and recognized developer “mskip”

,  
we now have a truly all-in-one

### **Google Nexus 4 Toolkit**

. Now, what makes this deal even sweeter is the addition of more than just a one-click bootloader unlock and root. Automatic driver installation, backup, flashing, mods, recovery booting and more. The Toolkit is strictly available for the Windows platform for now. Normally, the paradigm of Android development related to specific devices is always unpredictable, but I’m looking at a Nexus here, so no surprises at how fast this has come our way.

If you’re thinking twice about rooting your device, view our guide on the [top 10 reasons to root your Android device](#)

Download Nexus 4 Toolkit V1.0.0 from the following link: [http://www.4pda.com/showthread.php?p=11111111](#) when you click on the link, you will be redirected to the download page. [Google Nexus 4 Toolkit - Mirror](#)
