

For all you music lovers out there who like listening to online radio, we have an application that can [stream](#) as well as record online [radio stations](#). **JukeRec** has a massive collection of online radio stations specializing in a variety of music genres. All the stations are neatly divided into categories defined by their genre. If you like a radio station and feel that you might like to listen to it again, you may add it to favorites for quick access. The application allows you to [record](#) radio streams and save them to your hard disk. You can also edit the radio stream list and add new stations by their URL. JukeRec keeps a log of both play and record activity during a session.

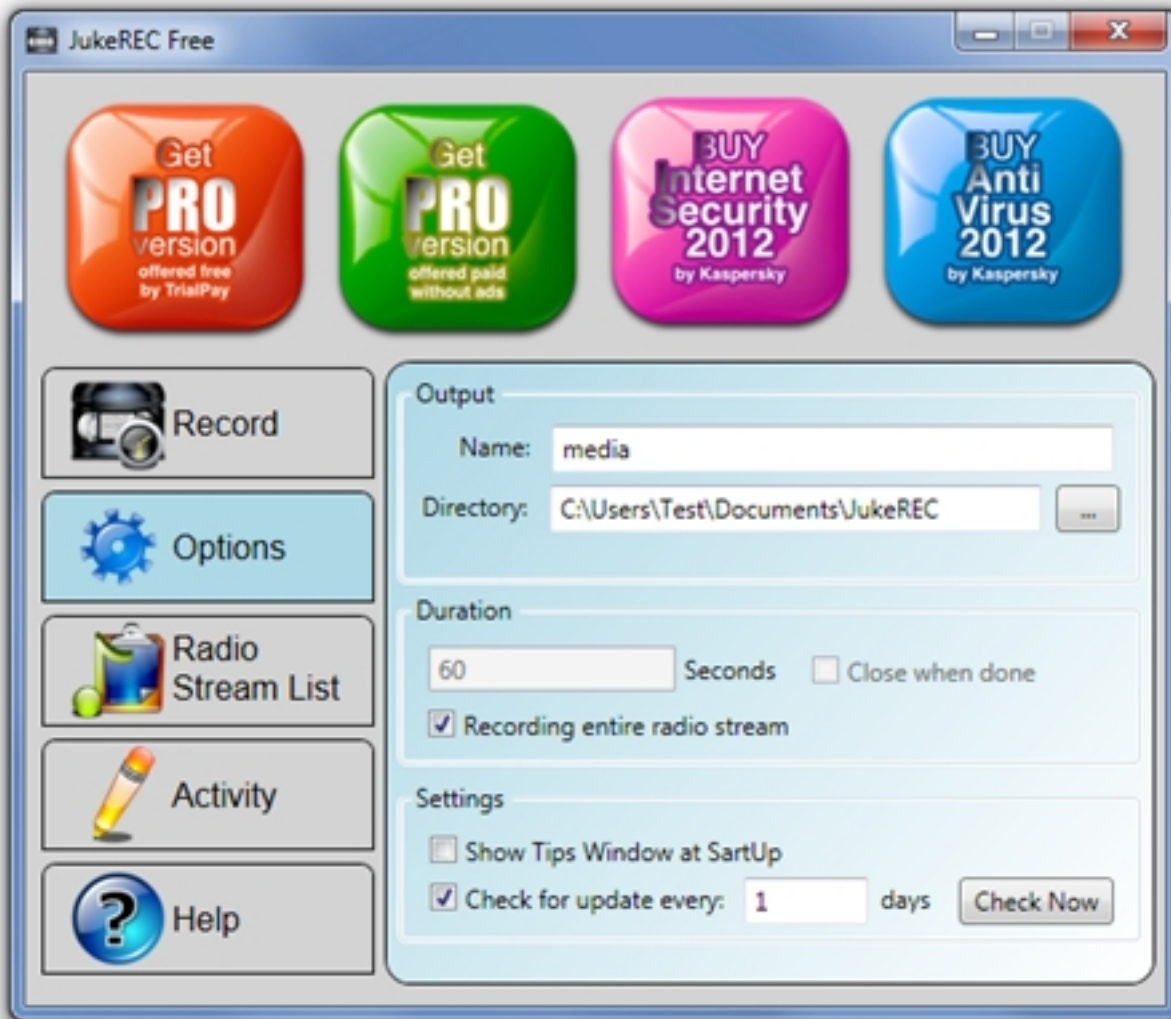

The interface of JukeRec is divided into two panes. *Record, Options, Radio Stream List, Activity* and *Help* tabs are in the left pane, and their details appear in the right pane when selected.

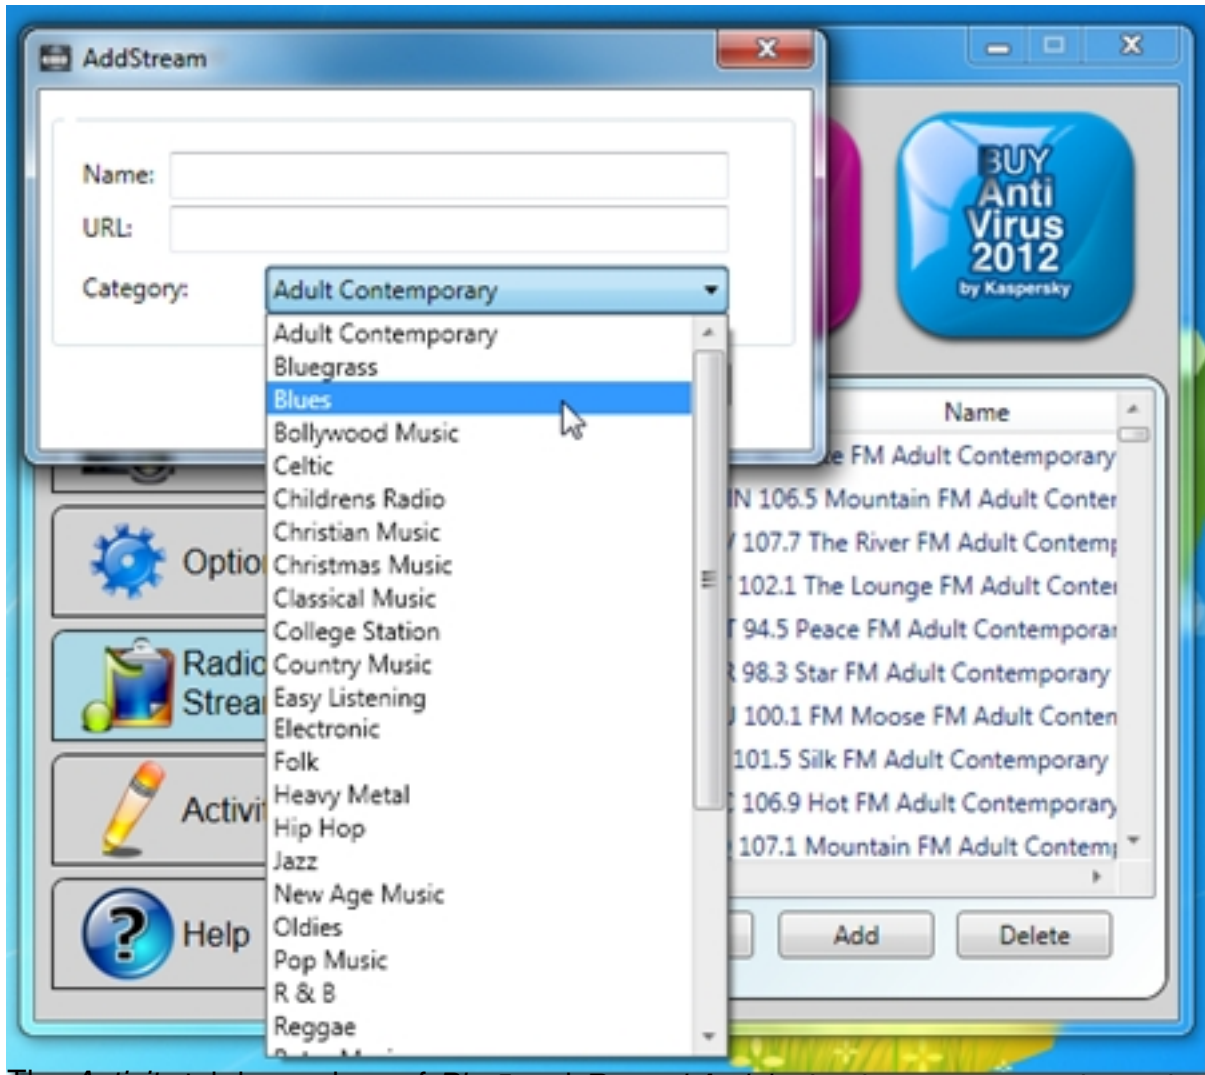

The **Record** button is the default selection. To stream a radio station of your choice, select the **Category** and **Station** dropdown menus. To stream a radio station of your choice, select the **Category** and **Station** dropdown menus. To stream a radio station of your choice, select the **Category** and **Station** dropdown menus.

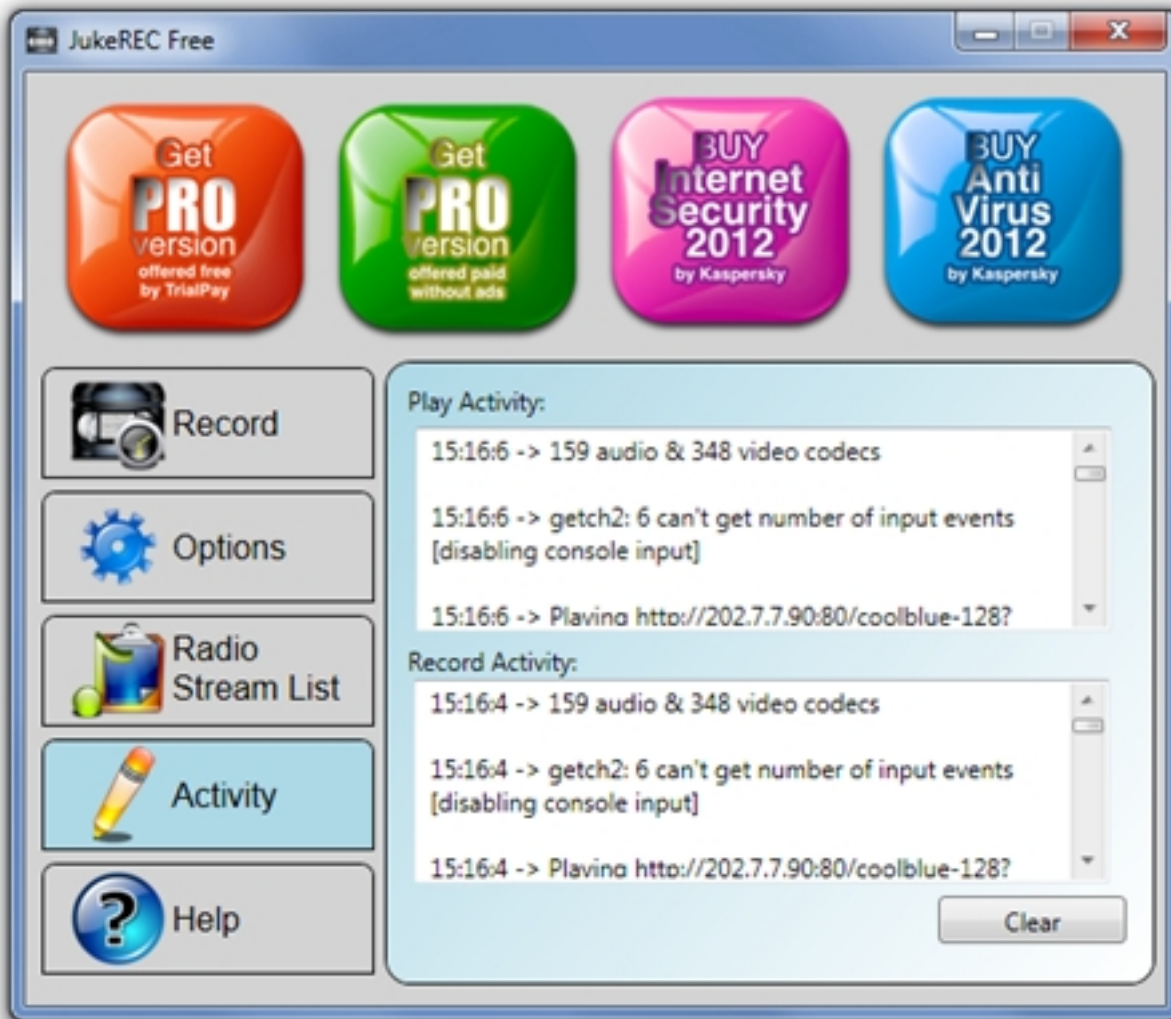

The Options tab lets you define the Name and Output Directory of the recorded files. Either you

to Radio Stream history, you can search, edit, delete and add a radio stream to the list. A

The *Activity* tab keeps logs of *Play* and *Record Activity* for the current session only.
