

Sharp has announced a new 3D Android smartphone in Japan, the Aquos SH8298U. This is the same phone whose images were posted a couple of months back on the FCC website. The specifications of this phone are mostly identical to what we reported earlier; a 4.2-inch, qHD resolution, stereoscopic 3D display, Qualcomm Snapdragon processor with single-core 1.4GHz CPU and Adreno 205 GPU, 512MB...
